

BHUVAN A B

B.E. Computer Science & Engineering | BMS College of Engineering | Expected 2028 | CGPA: 8.08/10
bhuvanab.cs24@bmsce.ac.in | +91 78290 23129 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFILE

Computer Science student focused on **AI/ML, LLM applications, backend engineering, and practical problem-solving**. Built end-to-end systems spanning CAD intelligence, quotation automation, queue estimation, APIs, and data-driven workflows; interested in turning research ideas into reliable, production-oriented software.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript | **Core CS:** DSA, Problem-Solving, SQL, DBMS, System Design

Web & Tools: REST APIs, FastAPI, Next.js/React, PostgreSQL, Git, Linux, Tableau | **AI/ML:** Machine Learning, Neural Networks, Generative AI, LLMs, RAG, Prompt Engineering

TECHNICAL PROJECTS

ForgeIQ – AI-Powered Manufacturing Intelligence Platform | *Python/FastAPI, Next.js/React, PostgreSQL, CAD Parsing, NLP*

- Built deterministic CAD feature parsing and geometry extraction for manufacturing workflows.
- Developed 40+ secure REST endpoints with OpenAPI 3.1, JWT authentication, rate limiting, and robust error handling.
- Engineered rule-based pricing/quotation automation with 96.9% accuracy; built a 9-stage production tracking pipeline.
- Validated reliability with 33/33 pytest tests, 14 Playwright E2E tests, and load testing achieving 5.5× throughput improvement.

QWait Estimator – Queue & Wait-Time Management Platform | *QR Check-in, Live Queue Tracking, Dashboards, Mapping*

- Built a clinic queue-management platform with QR check-in, live status tracking, and wait-time estimation.
- Designed doctor/staff dashboards and venue mapping to improve operational visibility and patient flow.

PROBLEM SOLVING & LEADERSHIP

- 100+ LeetCode problems solved across arrays, trees, graphs, and dynamic programming.
- Rotaract Club of BMSCE – Member & Social Services Volunteer (2024–Present); BMSCE ACM Student Chapter – Member (2024–Present).
- FFE Scholarship – Foundation for Excellence (Dec 2024); 10 AI learning tracks spanning ML, NLP, LLMs, and Agentic AI.
